jamf | PRO

Let HCS Technology Group perform a health check on your Jamf Pro server.

Has your Jamf Pro server gone though many different Jamf Pro Administrators? Do you have a complete understanding of exactly how your Jamf Pro sever is configured? Do you have up-to-date documentation for everything necessary to integrate your Jamf Pro server with the myriad of external services it supports? If not, Let HCS Technology Group preform a health check on your Jamf Pro Server.

The health check process includes:
• In-depth discovery of your Jamf Pro server
• Documentation of key findings and actionable recommendations
• Up to two-day(s) of remote sessions scheduled in four-hour blocks.

We can also arrange onsite time (T&E will apply).

Benefits

To ensure your Jamf Pro server is running optimally, HCS Technology Group will check the following:
